

The diagram illustrates a container architecture stack. At the top, two red ovals labeled 'App' are shown, each enclosed in a red rectangular box. These boxes are positioned above a large green oval labeled 'Container engine'. The 'Container engine' is situated above a light blue rectangular box labeled 'Host OS'. Finally, the 'Host OS' is positioned above another light blue rectangular box labeled 'Host hardware'. A dashed line separates the top components (Apps, Container engine) from the bottom components (Host OS, Host hardware).
