

The diagram illustrates the architecture of virtual machines. At the top, two identical virtual machines are shown, each enclosed in a red rectangular border. Inside each VM, there are two red ovals: the top one is labeled 'App' and the bottom one is labeled 'Guest OS'. Below these VMs is a large green oval labeled 'Virtual machine monitor'. At the bottom of the diagram are two light blue rectangular blocks, the top one labeled 'Host OS' and the bottom one labeled 'Host hardware'. A dashed line separates the VMM from the Host OS.
